

NYeC Call for Nominations: SHIN-NY's Technical Advisory Committee and Statewide Data Use Committee

June 16, 2026

Through the SHIN-NY's Statewide Collaboration Process (SCP), NYeC is seeking nominations for seat(s) on both the Technical Advisory Committee (TAC) and Statewide Data Use Committee (SDUC). The membership categories for the TAC must be ***a representative of a health care entity required to contribute data to the SHIN-NY, or their representative(s) which may include state hospital associations;*** and for the SDUC must be ***a consumer or patient advocate.***

Details on the purpose and purview of the Committees, along with qualifications for the desired membership seat available, are included below. The member(s) for these seats will be appointed to the Committee by the NYeC Board of Directors from a slate submitted by the NYeC Nominating Committee. Nominations must be submitted to NYeC through info@nyehealth.org by July 16, 2026.

SHIN-NY Technical Advisory Committee (TAC)

The SHIN-NY Technical Advisory Committee (TAC) provides advice and recommendations on technical standards for interoperability and data sharing within the SHIN-NY. The Committee provides input and recommendations on topics including, but not limited to:

- Defining what constitutes "Core SHIN-NY Data," i.e., data that must be contributed to the SHIN-NY;
- Potential SHIN-NY data collection and transmission standards to promote standardization, quality, interoperability, and use;
- Technical requirements to fulfill statewide use cases or as required to support New York State public health activities and population health objectives (e.g., Medicaid 1115 Waiver);
- New federal or state developments and their implications for the SHIN-NY; and
- Direct data contribution standards to the statewide data infrastructure (SDI).

In providing advice and recommendations, the TAC will seek to leverage national HIE standards and to harmonize with evolving federal program requirements to the extent possible, aiming to limit the burden of adoption on New York participants.

The TAC is seeking a member with health information exchange (HIE) and health information technology (HIT) expertise who is willing and able to represent the broad and diverse interests of New York State's health care community.

SHIN-NY Statewide Data Use Committee (SDUC)

The SHIN-NY Statewide Data Use Committee (SDUC) applies the requirements and procedures for the disclosure of data using the statewide data infrastructure (SDI) defined in SHIN-NY policy guidance by reviewing and adjudicating data use requests. The SDUC serves as subject matter experts on the contents of the SDI and the permitted purposes for which SDI data may be used, as well as prohibited uses of the same. The SDUC has a combination of advisory and decision-making roles, including:

- Developing and amending SHIN-NY SOPs for the review and adjudication of data use requests which require use, disclosure, or re-disclosure of data from the SDI, including amending the list of SDI Permitted Purposes, subject to approval by the NYeC Board and NYS DOH; and
- Adjudicating data use requests consistent with the SHIN-NY SOPs.

The SDUC is seeking a member with consumer or patient advocacy experience to represent the interests of New York State's health care community.

Are you interested in a role on one of these committees or want to nominate someone else? Please email the individual's name, role, and applicable resume/qualifications to info@nyhealth.org for consideration by NYeC's Nominating Committee by July 16, 2026.
